### Fabric Care

Remove all stains immediately before they set. Do not use: solvents, abrasives, chemical agents, waxes or polishes. Use a vacuum cleaner or soft brush to remove dust and solid particles Most stains can be removed using cold/warm water and a clean microfibre cloth. Use cold water when treating stains caused by bodily fluids. Stains from products containing oil and grease should be treated with a spirit based solution. Clothing dyes and biro are very difficult to remove from any fabric and may cause permanent stains. Can be steam cleaned in situ.

Note: Actual fabrics may vary in colour due to digital reproduction  
Please contact us and request fabric samples prior to placing orders.
